WORK EXPERIENCE

Frontend Developer (Internship) | Cinereous

April 2024- present

- Developed responsive and interactive user interfaces using modern frontend technologies like HTML, CSS, and Typescript.
- Worked extensively with frameworks such as Angular, translating design mockups into functional and optimized web applications.
- Collaborated with backend developers and designers to ensure seamless integration and performance of web applications.
- Used tools like Git for version control and Webpack for bundling and optimizing code.
- Stayed updated with the latest industry trends to improve application efficiency and user experience.

PROJECTS

IAMDIGIPRO - Cinereous

- Developed and maintained the IAMDIGIPRO project using Angular, focusing on creating responsive and dynamic user interfaces.
- Collaborated with the team to implement efficient, scalable components that improved the overall user experience.

Portfolio Website

- Description: Built a personal portfolio using HTML, CSS, and JavaScript to showcase skills, projects, and achievements.
- Key Skills: Responsive design, cross-browser compatibility, user experience.

To-Do List Application

- Description: Designed and implemented a to-do list app with task creation, editing, and deletion functionality.
- Key Skills: JavaScript, DOM manipulation, local storage.
